Art Unit: 1732

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 15, 17 and 25-32, drawn to a method and system for marking a protective layer, classified in class 264, subclass 1.7.
- II. Claims 18, 24 and 33-37, drawn to a method and system for marking a product, classified in class 264, subclass 1.1.

The inventions are distinct, each from the other because:

Inventions I and II are considered to be separate or distinct in that they have different utility in the art. Group I claims are directed to marking a protective layer while those of Group II are not so limited in that the marking would be in the bulk of the polymeric product.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Donner on July 23, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1732
